ABOVE THE LAW

How The Government Lets Major Air Polluters Off The Hook

Illinois

John Coequyt Richard Wiles Christopher Campbell

Acknowledgments

Above the Law. Thanks to Ken Cook for editing and advice with the report and to Marshall Hendricks for his assistance with the data analysis of *Above the Law.* We wish to thank Neil Carman, Ed Hopkins, Keri Powell, and Velma Smith for their help in developing and refining the report and the many organizations releasing the report which are too numerous to name here. We would also like to thank the conscientious staff at the Environmental Protection Agency and the AFS and SFIP hotlines for their help with the data requirements of this report.

Above the Law was made possible by grants from the SBF Fund of the Tides Foundation and the Joyce Foundation. The opinions expressed in this report are those of the authors and do not necessarily reflect the views of the supporters listed above. Environmental Working Group is responsible for any errors of fact or interpretation contained in this report.

Above the Law in Illinois

Executive Summary

An Environmental Working Group analysis of U.S. Environmental Protection Agency (EPA) Clean Air Act enforcement records reveals a persistent pattern of violations of state and federal clean air rules by big polluters in five major industries in Illinois. The records, audited by industry and state regulators prior to their release, show that state officials in Illinois are doing little to enforce the Clean Air Act, and federal officials with the U.S. EPA are allowing this poor performance to continue. Large industrial corporations are taking advantage of lax enforcement to avoid compliance with clean air rules that they had an active hand in developing though the public comment process.

This new analysis of 18 facilities (17 major facilities) in Illinois, from January 1997 through December 1998, shows that:

 Thirteen (13) of the seventeen major facilities analyzed were out of compliance with the Clean Air Act at least one quarter, and an average of six of the eight quarters in the two-year period analyzed. Only five of these facilities were fined by the state of Illinois or the U.S. EPA during that time (Table 1). These facilities include all permitted polluters in the state in auto assembly, iron and steel, petroleum refining, pulp manufacturing, and metal smelting and refining industries.

- The parent corporations that owned these facilities reported total combined revenues of \$306 billion in 1998, compared with total fines of \$3,344,700 levied against only five of the thirteen companies that violated clean air safeguards in Illinois (Table 1).
- Five companies have been out of compliance with the Clean Air Act every quarter for the past eight quarters. Three of these facilities were fined (Table 1).
- Eight of the seventeen facilities analyzed were listed as current "significant violators" of the Clean Air Act (Table 2). Three of these facilities were fined.
- Four facilities violating clean air rules are located in communities that fail to meet state or federal health standards for that same pollutant emitted by the facility. These include Chicago Tissue Co. L.P. in Alsip, Clark Oil & Refining Corp. in Hartford, National Steel Corp. in Granite City and Northwestern Steel and Wire Co. in Sterling.

It is clear from this analysis that there is no undue regulatory burden on air polluters in Illinois, a finding that severely undermines the rationale for so-called regulatory reform legislation at the federal level. Industry argues that most regulatory actions brought against facilities are initiated by "overzealous biggovernment regulators" for minor paperwork violations that consume massive amounts of resources for little environmental gain. The facts are that few enforcement actions are brought in the first place and that almost none of the actions are for recordkeeping violations. In both 1997 and 1996, less than two percent of all enforcement actions were concluded with only recordkeeping changes. In contrast to the image of a crushing regulatory burden, this analysis clearly shows that there is barely any enforcement at all of existing clean air health protections and virtually no pressure for air polluters to comply with current pollution control laws.

This finding also brings into question the effectiveness of the Illinois audit privilege law. Based on the current state of air pollution enforcement in Illinois, it is safe to say that after four years on the books. the Illinois audit privilege law has done nothing to reduce pollution or improve compliance with clean air standards. In spite of all the rhetoric to the contrary, there is little factual evidence that anything other than stepped-up enforcement, larger fines, and tougher federal government oversight will increase compliance with environmental laws and reduce the serious levels of air pollution that continue to plague most metropolitan areas in the United States.

Recommendations

Substantial evidence shows that thousands of large companies routinely violate their pollution permits. They discharge too much waste into waterways, emit excess pollutants into the air, and mismanage the hazardous waste they create or accept for treatment or disposal. These chronic violations of environmental laws add to pollution of air and water, contributing to health risks, and put law-abiding companies at an unfair economic disadvantage. Constrained by limited resources or a lack of political will, regulatory agencies take effective enforcement action against only a relatively small percentage of violators.

Major improvements in air quality in Illinois could be achieved just by strict enforcement of current laws and regulations. To achieve this goal however, both state and federal environmental enforcement agencies need to vastly improve their enforcement activities. Industry, in turn, needs to operate without such opportunistic disregard for environmental rules it typically helped to write.

To improve compliance with the Clean Air Act:

 Illinois should set strict limits on the discretion of its regulatory agencies. Facilities should not be allowed to be out of compliance with environmental laws for more than two quarters in any one-year period without facing mandatory penalties. A good example of a more effective state enforcement policy is the New Jersey law that is based on the popular "three strikes and you're out" model.

- The regional U.S. EPA office should exercise its authority and take over cases when Illinois assesses insufficient fines or delays during the enforcement process.
- Illinois's audit privilege law should be repealed and replaced with U.S. EPA's audit policy.
- U.S. EPA and Illinois should help concerned citizens participate in the development and enforcement of air pollution permits issued under Title V of the CAA. U.S. EPA and Illinois should monitor state implementation of Title V programs to ensure that the compliance-related information is readily understandable by – and available to – the public.

Table 1: Many multi-billion corporations in Illinois violated the Clean Air Act in the past two years and escaped with little or no fines.

Facility	City	Number of Violations 1997 - 1998*	Penalty**	Revenue
Clark Oil & Refining Corp.	Hartford, IL	8	renaity	\$3,700,000,000
Marathon Oil Company	Robinson, IL	8	\$75,000	\$24,800,000,000
National Steel Corp.	Granite City, IL	8	\$546,700	\$2,848,000,000
Northwestern Steel and Wire Co.	Sterling, IL	8		\$596,000,000
Shell Oil Company	Roxana/ Wood R, IL	8	\$2,178,000	\$128,100,000,000
Acme Steel Co.	Riverdale, IL	6	\$410,000	\$459,000,000
Austeel Lemont Co., Inc.	Lemont, IL	6		
Ford Motor Company	Chicago, IL	6	\$135,000	\$144,400,000,000
Birmingham Steel Corp.	Bourbonnais, IL	5		\$1,136,000,000
Chicago Tissue Co. L.P.	Alsip, IL	3		
Laclede Steel Co.	Alton, IL	3		
A. Finkl & Sons Co.	Chicago, IL	2		
The Celotex Corp.	Quincy, IL	2
