Complaint Information Form

1. Date and time complaint taken: 2/12/09 10:00 AND 1:00
2. Person taking complaint: GENE SMITH
3. Person reporting complaint: Name: DENNIS HAGY
Address: HC 62, BOX 209A
KENNA, WV 25248
Phone No.: (H) 304-988-1869 (W).
Best time to return call:
4. Company/person complaint is against / API#, Well Number, Farm Name, Etc:
EQUITABLE 511044 Phil Scullo 552-3907 or 348-3854 Jeremy White
543-2126
 - a. Have they been contacted? X Yes No.
 - b. County: JACKSON
5. What are the specific directions to the site?
6. Complaint in detail? Equitable ruined 95 foot deep and 50 year old water well. He and his wife have been sick for over a year with Nausea and cramping stomach, etc. Silver flakes and black goo in well water. Claims the frac ruined his well or the well that was covered up on location. Says there was a well that was lost and is covered up and the rig moved a drilled another hole. He says there is not a monument visible. His well water burns his skin and the vapors are what keeps them sick. He collected samples of radon gas in his home and got the analysis back today. He is convinced the radon level of 4.6 is the cause of their problem. He claims his house shook to the point of cracking his house when the well was fraced. I am going to contact the County Health Department in regard to the water well and Environmental Health Services for the Radon. Claims his well water looks like pit water and the creek is full of sand directly below the gas well location only. Ruined 2 hot water heaters with Calcium build up in them.
7. Inspectors remarks? Mr Hagy first complained to DEP/OOG about water quality on 11-17-08. Approximately 10 months after Equitable gas wells drilled. 3 gas wells drilled in the area but none in Mr. Hagy's drainage. Closest is approximately 1000 feet away. Equitable analytical results from Mr. Hagy's

water well show elevated Iron and Manganese. Equitable has offered to drill Mr. Hagy a new water well and are currently furnishing him bottled water and a motel room. Equitable has provided DEP/OOG with a pre and 2 post water well analyses on Mr. Hagy's water and the Littons water well. Littons are within 400 feet of suspect gas well and well water analysis shows little to no change. Mr. Hagy wanted his spring plumbed to house for use instead of water well. Need to ask for a copy of the analysis. Equitable's Mr. Sciullo says that there was not a well covered up and rig skidded. Continuing to negotiate with Mr. Hagy. I contacted Randy Curtis with Environmental Health Services 558-6721 and he was to call Mr. Hagy 2-19-09 in regard to the Radon. He said 4.6 was not serious and if the samples were collected in damp places such as near the sink faucets the tests wouldn't be accurate. DEP/OOG Inspector Jamie Stevens made inspections on several occasions. No violations were written.
