Here are copies of the formaldehyde CP and an amendment. John Gasper was able to send these to me quickly.

I find it amazing but that when the comms people are excited about cosmetics, then things get going. But when the scientists speak, nobody cares. Bloody amazing. I really don't care as much as I did before. "They" have managed to make me numb to their irrationality and to their short attention span. This excitement shall pass, once the WEN novelty runs out.

Nakissa,

Please find attached the petition and an amendment to the petition that EWG filed. Thank you.

Regards,  
John

John,

Do you have an electronic copy of the formaldehyde CP? I have asked Tyna also, but I not at my desktop, so I thought that I would ask you too. Thanks.
