Bob,

The first adverse event reported in the CAERS database on hair smoothing products was in 1993 on Imperial Dax Co Inc.'s Dax Pressing Oil Hair Straightening. We have since received a total of 74 reports on various hair straightening products. There were 50 complaints specifically on Brazilian Blowout products that were reported between 5/21/2009-11/30/2010.

Wendy,

When did the first adverse reactions to hair smoothing products start to come in?

Bob
