Allison,

Please find attached, the draft formaldehyde review, that you can use for initiating the drafting of the codified for banning this ingredient. I believe that ORP (is it ORP or ORPSS?) is writing the codified, unless I am mistaken. Please let me know if you need to talk. I have also attached the draft OCAC review of the EWG CP. The response letter has not been drafted, since writing the regs would essentially mean that we are granting the CP, but at this point, we have proposed to grant request 1, and deny the other 2 requests, since we have not yet banned the ingredient. thanks.

Nakissa
