

ABOVE THE LAW

How The Government Lets Major Air Polluters Off The Hook

Louisiana

John Coequyt

Acknowledgments

Above the Law. Thanks to Ken Cook for editing and advice with the report and to Marshall Hendricks for his assistance with the data analysis of *Above the Law.* We wish to thank Neil Carman, Ed Hopkins, Keri Powell, and Velma Smith for their help in developing and refining the report and the many organizations releasing the report which are too numerous to name here. We would also like to thank the conscientious staff at the Environmental Protection Agency and the AFS and SFIP hotlines for their help with the data requirements of this report.

Above the Law was made possible by grants from the SBF Fund of the Tides Foundation and the Joyce Foundation. The opinions expressed in this report are those of the authors and do not necessarily reflect the views of the supporters listed above. Environmental Working Group is responsible for any errors of fact or interpretation contained in this report.

Executive Summary

An Environmental Working Group analysis of U.S. Environmental Protection Agency (EPA) Clean Air Act enforcement records reveals a persistent pattern of violations of state and federal clean air rules by big polluters in five major industries in Louisiana. The records, audited by industry and state regulators prior to their release, show that state officials in Louisiana are doing little to enforce the Clean Air Act, and federal officials with the U.S. EPA are allowing this poor performance to continue. Large industrial corporations are taking advantage of lax enforcement to avoid compliance with clean air rules that they had an active hand in developing through the public comment process.

This new analysis of 33 facilities (33 major facilities) in Louisiana, from January 1997 through December 1998, shows that:

- Four (4) of the thirty-three major facilities analyzed were out of compliance with the Clean Air Act at least one quarter, and an average of six of the eight quarters in the two-year period analyzed. Only two of these facilities were fined by the state of Louisiana or the U.S. EPA during that time (Table 1). These facilities include all permitted polluters in the state in auto assembly, iron and steel, petroleum refining, pulp manufacturing, and metal smelting and refining industries.
- The parent corporations that owned these facilities reported total combined revenues of \$128 billion in 1998, compared with total fines of \$328,000 levied against only two of the four companies that violated clean air safeguards in Louisiana (Table 1).
- One company, Placid Refining Co. in Port Allen has been out of compliance with the Clean Air Act every quarter for the past eight quarters. Placid Refining Co. was fined at all during that time (Table 1).
- Nine of the thirty-three facilities analyzed were listed as current “significant violators” of the Clean Air Act (Table 2). Six of these facilities were fined.
- One facility, Placid Refining Co., is violating clean air rules in a community that fail to meet state or federal health standards for that same pollutant emitted by the facility.

It is clear from this analysis that there is no undue regulatory burden on air polluters in Louisiana, a finding that severely undermines the

rationale for so-called regulatory reform legislation at the federal level. Industry argues that most regulatory actions brought against facilities are initiated by "overzealous big-government regulators" for minor paperwork violations that consume massive amounts of resources for little environmental gain. The facts are that few enforcement actions are brought in the first place and that almost none of the actions are for recordkeeping violations. In both 1997 and 1996, less than two percent of all enforcement actions were concluded with only recordkeeping changes. In contrast to the image of a crushing regulatory burden, this analysis clearly shows that there is barely any enforcement at all of existing clean air health protections and virtually no pressure for air polluters to comply with current pollution control laws.

Recommendations

Substantial evidence shows that thousands of large companies routinely violate their pollution permits. They discharge too much waste into waterways, emit excess pollutants into the air, and mismanage the hazardous waste they create or accept for treatment or disposal. These chronic violations of environmental laws add to pollution of air and water, contributing to health risks, and put law-abiding companies at an unfair economic disadvantage. Constrained by limited resources or a lack of political will, regulatory agencies take effective enforcement action against only a relatively small percentage of violators.

Major improvements in air quality in Louisiana could be achieved just by

strict enforcement of current laws and regulations. To achieve this goal however, both state and federal environmental enforcement agencies need to vastly improve their enforcement activities. Industry, in turn, needs to operate without such opportunistic disregard for environmental rules it typically helped to write.

To improve compliance with the Clean Air Act:

- Louisiana should set strict limits on the discretion of its regulatory agencies. Facilities should not be allowed to be out of compliance with environmental laws for more than two quarters in any one-year period without facing mandatory penalties. A good example of a more effective state enforcement policy is the New Jersey law that is based on the popular "three strikes and you're out" model.
- The regional U.S. EPA office should exercise its authority and take over cases when Louisiana assesses insufficient fines or delays during the enforcement process.
- U.S. EPA and Louisiana should help concerned citizens participate in the development and enforcement of air pollution permits issued under Title V of the CAA. U.S. EPA and Louisiana should monitor state implementation of Title V programs to ensure that the compliance-related information is readily understandable by – and available to – the public.

Table 1: Many multi-billion corporations in Louisiana violated the Clean Air Act in the past two years and escaped with little or no fines.

Facility	City	Number of Violations 1997 - 1998*	Penalty**	Revenue
Placid Refining Co.	Port Allen, LA	8		
Gold Line Refining LTD.	Lake Charles, LA	7	\$321,000	
Shell Oil Company	Norco, LA	7	\$7,000	\$128,100,000,000
Arcadia Refining	Lisbon, LA	2		

Source: Environmental Working Group. Compiled from U.S. EPA SFIP/AFS data, Company Annual Reports and Fortune 500 listings as of April 15, 1999.

* Violations are reported quarterly.

** The most recent data reports penalty amounts from 1997, 1998 and where available, 1999.

Table 2: Industrial facilities currently listed by the Louisiana EPA as "significant violators" of the Clean Air Act.*

Facility	City	Penalty**	Revenue
Arcadia Refining	Lisbon, LA	\$0	
Bayou Steel Corp.	Laplace, LA	\$0	
Citgo Petroleum Corporation	Lake Charles, LA	\$0	\$10,912,000,000
Conoco Inc	Westlake, LA	\$324,000	\$23,168,000,000
Gold Line Refining LTD.	Lake Charles, LA	\$321,000	
International Paper Co.	Mansfield, LA	\$46,000	\$19,500,000,000
Mobil Oil Corporation	Chalmette, LA	\$90,000	\$47,700,000,000
Pennzoil Producing Co. (Atlas)	Shreveport, LA	\$80,000	\$1,900,000,000
Shell Oil Company	Norco, LA	\$7,000	\$128,100,000,000
