These fruits pack the most nutrition for the lowest cost

FRUITS

- apricot
- avocado
- banana
- cantaloupe
- grapefruit**
- honeydew
- kiwi
- orange juice*
- nectarines domestic
- papaya
- pear
- starfruit
- tangerine
- watermelon

⚠️ Peaches are also nutritious but may have more pesticides than other fruits. Check prices for organic.

❤️ *Limit juice to 1 cup a day. Children should drink less.

**On medicine? Ask your doctor about grapefruit.

DRIED FRUITS

- apricots
- mango
- california raisins
- prunes

⚠️ Dried apples are also nutritious but may have more pesticides than other fruits. Check prices for organic.

❤️ Don’t overdo dried fruit – it has LOTS of sugar! One serving equals ¼ cup
TOP TIPS
FRUITS

Aim for variety and two servings daily.

- Love lemons. Put lemon juice in your salad dressing. Cook fish on a bed of lemon slices to add flavor and moisture and keep your pan clean.

- Cut and freeze fresh fruit when it’s on sale or overripe. Use later in smoothies, oatmeal or yogurt (see recipes on pages 20 & 23). To eliminate clumping, lay pieces on a tray in the freezer or freeze pureed fruit in ice cube trays. When frozen, transfer to a bag.

SNACK SMART

These healthy snacks average 44 cents per 1 cup serving—less than a postage stamp—and will power you up.

- Snack on fruits and vegetables. You can get your five to nine servings a day for about the cost of a bus ride.

- Apricots, bananas, pears and tangerines are great for lunch boxes (wrap apricots in a napkin to prevent bruising).

- Make a fruit bowl. Slice up a kiwi and chop cantaloupe, watermelon, papaya (or have kids do it themselves with a spoon or melon baller) or starfruit (kids love the shape) into bite-size pieces. Fill a small container for lunches.

- Try raw carrots, broccoli or snow peas as an afternoon snack. They are great dipped in hummus or bean dip (see recipe on page 24).
These vegetables pack the most nutrition for the lowest cost.

**VEGETABLES**

**DARK GREEN**
- broccoli
- collards
- kale
- lettuce romaine
- mixed salad greens

⚠️ All of these (except broccoli and parsley) may have more pesticides than other vegetables. Check prices for organic.

**RED/ORANGE**
- calabaza
- carrots
- pumpkin fresh
- sweet potato
- tomatoes low sodium (salt), canned
- tomato juice low sodium (salt)

⚠️ Sweet red and green peppers are also nutritious, but may have more pesticides than other vegetables. Check prices for organic.

**Recipes**
1. Crunchy peanut slaw – page 19
2. Make-it-a-meal salad – page 18
4. Tabbouleh – page 20
5. Kid approved roasted veggies – page 19
**STARCHY**

- corn
- frozen lima beans
- fresh potatoes
- roasted, baked or boiled

Make room for other vegetables by eating less of these high-carbohydrate vegetables.

**THE REST**

- alfalfa sprouts
- brussels sprouts
- cabbage
- chayote
- pear squash
- eggplant
- green onions
- okra
- frozen onions
- snow peas
- fresh zucchini, yellow squash, other summer squashes

*Potatoes and green beans may have more pesticides than other vegetables. Check prices for organic.

Eat more, and eat a variety of vegetables. You can’t go wrong with vegetables! Our “best” picks are good to start with, but try other produce, too.

**TOP TIPS**

- **Vegetables about to go bad?** Freeze them or make soup (see recipe on page 25).

- Stock up on long-lasting vegetables and store them in a cool, dry place. **Potatoes, carrots, pumpkin, calabaza, and sweet potatoes** taste great for several weeks after you buy them. **Frozen vegetables** and **cabbage** keep well, too.

- Add healthy flavor. Toss **green onions** on stir-fries, dips, rice or soup. Stuff **parsley** in tomatoes, serve over grilled fish or meats, serve with hummus and pita or make tabbouleh (see recipe on page 20).
**Breakfast Cereal**

- oatmeal
- puffed corn
- puffed whole grain cereal
- shredded wheat
- toasted oat cereal

Read the nutrition facts

- **Low sugar**: Pick a whole grain cereal with the lowest sugar content.
- **High fiber**: Try for at least three grams of fiber per serving.
- **Lower sodium (salt)**: Look for a cereal with less than 210 mg of sodium per serving.

**Bread and Pasta**

- Read the nutrition facts

  - **Low sodium (salt)**: Pick whole grain bread or pasta with the lowest sodium content.
  - **High fiber**: Try for at least 2 grams of fiber per serving in bread and 5 grams in pasta.
RICE AND OTHER GRAINS

barley  
bulgur  
brown rice

TOP TIPS

- **Don’t be fooled.** Read the label. Make sure the word “whole” is the very first ingredient listed. “Multi-grain” or “wheat” isn’t enough. Just because it looks brown, doesn’t mean it’s whole grain.

- **Start kids off right** with whole grains, not white bread and white pasta. If they’re not used to whole grains, mix them in gradually.

- **Buy in bulk and stock up during sales.** Make your own oatmeal (see recipe page 20). Packets cost more and are often loaded with salt and sugar. Buy brown rice in bulk and mix with white rice if needed to lower cost. Buy whole grain bread on sale and save in the freezer.

- Ready for something new? Try quinoa instead of rice. Look for it on sale or in bulk.

1. Tasty oatmeal – page 20
2. Chinese veggies and rice – page 21
3. Tabbouleh – page 20
4. Barley stew – page 22
SEAFOOD

cod
Alaskan or Pacific
croaker*
haddock
perch*
salmon
Alaskan or Pacific
squid
tilapia
tuna*
canned light
whiting or silver hake

*Limit croaker, perch and canned light (not albacore) tuna to once a month. These fish may contain industrial pollutants.

Fresh or frozen wild Alaskan or Pacific salmon are best. Canned salmon is a lower cost alternative.

BEANS & MORE

black beans
black-eyed peas
cowpeas
chickpeas
garbanzo beans
eggs
baked, boiled or poached
lentils
lima beans
mungo beans
pink beans
pinto beans
red kidney beans
white beans
### NUTS & SEEDS

- ** almonds roasted, unsalted
- ** hazelnuts
- ** peanuts roasted, unsalted
- ** pecans
- ** sunflower seeds
- ** walnuts

### MEATS

- ** chicken remove skin
- ** turkey light and dark meat, remove skin
- ** goat*

*Goat is the world's most commonly eaten meat. See recipe on page 25.

Skip processed meat like hot dogs, sausage and deli meats. They are high in salt and additives. Lean meats have fewer pollutants.

### TOP TIPS

- ** Eggs, beans and nuts** are excellent sources of protein and easy to add to almost any dish.

- Add **nuts** to oatmeal, cereal, salads and stir-fries for a healthy, hearty meal. Raw nuts are often cheaper. Roast them for a delicious snack. Nuts stay fresh longer in the freezer.

- Whole or cut-up bone-in **chicken** can be a money saver. Bake extra and use all week. Buy family-size packs on sale and freeze.

- Soak and cook **dried beans** to save money. Canned beans save time, but rinse them before using.
Skip whole milk.

Health experts recommend fat-free or low-fat (1%) milk—as much calcium, with fewer industrial pollutants and calories.

Infants are the exception:

- Children under 1 year old should not drink cow’s or soy milk. Breast is best, or formula.
- Children ages 1 to 2 can drink whole cow’s milk.
- Children older than 2 should drink low-fat (1%) or fat-free (skim) milk – like the rest of the family. For kids not used to low-fat milk, mix it in gradually.

Not all dairy products are rich in calcium. Fatty foods like cream cheese, sour cream, cream and butter have little or no calcium and should be used sparingly.
Eat less cheese. Low fat **cheddar**, **Colby**, **Monterey** and **mozzarella** can have a lot less saturated fat but may have more sodium (salt) and additives.

**TOP TIPS**

- **Dry milk powder** plus water makes a low-cost substitute in recipes.
- Freeze **cheese** that starts going bad. Defrosted cheese tastes best melted. Don’t buy shredded cheese – shred it yourself.
- Substitute **yogurt** for cream and sour cream in recipes. Drain yogurt in a coffee filter to thicken. To cut cost and packaging waste, buy in large containers and measure out small servings.

Skip flavored “light” and “lite” **yogurts**, often loaded with sugar, artificial sweeteners and additives. Add fruit to plain yogurt or cottage cheese.
COOKING FATS AND OILS

These oils have the most nutrition for the lowest cost

OILS

canola oil*
corn oil*
olive oil**
peanut oil
safflower oil**
soybean oil*
sunflower oil**

*Looking to avoid GMOs? Check prices for organic.

**Use these oils to give a flavor boost to salad dressings. Or mix 1 part with 9 parts of cheaper cooking oil for great flavor and nutrition at a lower price.

Skip solid and trans fats. If it's solid at room temperature or the label says trans fats, beware. Limit these fats for heart health. Remove chicken skin. Eat less beef, pork, cheese, lard, butter, stick margarine, shortening and foods with partially hydrogenated oils.

TOP TIPS

- Top whole-grain toast with peanut or almond butter, add sliced banana if you like. Or spread hummus (see recipe page 24), black or pinto bean dip or avocado on top.

- Make your own cooking spray with a spray bottle and your favorite oil. You'll use less oil and save money.

**STAPLES AND SPICES**

**STAPLES**

These longer-lasting supplies can be bought in bulk or in larger sizes when on sale.

**Used often**
- honey or brown sugar
- peanut butter
- soy sauce
- low sodium (salt)
- vinegar

**Handy to have**
- dijon mustard
- stock for soups
- low sodium (salt)
- whole wheat flour

**SPICES**

Spices go stale, so they are best bought in small amounts and whole when you can find them. Grinding only what you need (kids love using a mortar and pestle) helps them keep longer—and you don’t have to use as much. Ethnic markets often stock spices at good prices. The best way to save on spices: grow your own!

**Used often**
- salt
- pepper
- onions
- garlic
- lemon juice
- cinnamon
- cayenne pepper

**Handy to have**
- bay leaves
- cumin
- rosemary
- thyme
- vanilla extract
- chili powder
- dill
- fennel
- ginger
- lime juice
- dried oregano
- paprika
- parsley
